If you would like to **visit** with an individual who is already in a program, **please let music therapy staff know and we will find a comfortable space for you both to chat.** This will allow the individual to attend to you better and ensure that *our other residents can focus on the music therapy experience without additional distractions.*

If you need to **treat/work with** an individual who is in a music therapy session, **if possible, please** allow your person to finish the therapy session. The music therapy staff will be glad to transport the resident to you as soon as their interventions have finished.
